PHILOSOPHICAL MAGAZINE

Editor:

Professor E. A. DAVIS

Associate Editors:

Professor J. E. ENDERBY

Professor A. J. FORTY

Dr. P. M. HAZZLEDINE

E.P.S. Editorial Committee:

Professor J. FRIEDEL (Paris)

Professor A. SEEGER (Stuttgart)

Professor U. VALDRÈ (Bologna)

Consultant Editor:

Professor Sir NEVILL MOTT

Book Review Editor:

Dr. E. MARSEGLIA

Subscription Information

USA, Canada and Mexico (air freight): annual subscription (payable in advance), $470·00; per part $42·00 (surface post paid). Air freighted to the USA and mailed from Jamaica, New York, by Publications Expediting Inc., 200 Meacham Avenue, Elmont, New York 11003. Second class postage paid at Jamaica, New York. US subscribers should send order and cheque (in favour of Taylor & Francis Ltd) to Account 04 810 879 Bankers Trust Company, P.O. Box 9137, Church Street Station, New York, N.Y. 10049.

Japan (accelerated surface post): apply to exclusive agents, Kinokuniya Company Ltd, Odakyu West-Shinjuku Building, 47–1 Hatsudai 1-chome, Shibuya-ku, Tokyo 151. Telex 2322535.

FR Germany (surface post): annual subscription (payable in advance), DM 724·00; per part DM 66·00. Subscribers in FR Germany should send order and cheque (in favour of Taylor & Francis Ltd) to Account No. 073/6686, Deutsche Bank AG, BLZ 500 700 10, Postfach 2623, Rossmarkt 18, 6000 Frankfurt/Main 1.

UK and the rest of the world (surface post; accelerated surface post to Australasia; air freight to India): annual subscription (payable in advance), £165·00; per part £15·00 (surface post paid).

Published monthly by Taylor & Francis Ltd, 4 John Street, London WC1N 2ET, UK. Telex 858540.

Printed by Taylor & Francis (Printers) Ltd, Rankine Road, Basingstoke, Hampshire RG24 0PR, UK.

Editorial

Dislocation–inclusion interactions during creep
By B. BURTON 1

Influence du gravage des joints de grains sur la vitesse de fluage diffusion des fils à structure bambou et la détermination corrélative de la tension superficielle
Par P. RÉGNIER et M.-F. FELSEN 11

Fluage de fils de cuivre à structure bambou dans et hors du domaine de contrainte où la diffusion contrôle la vitesse de déformation
Par M.-F. FELSEN et P. RÉGNIER 29

Void formation in electron-irradiated Ni–12 at. % Ti alloys with modulated structures
By K. SAITO 43

Radiation-induced creep in single crystals of face-centred-cubic materials
By W. G. WOLFER 61

Significance of fluctuations in the evolution of voids during irradiation
By K. KRISHAN 71

Sliding at twin boundaries during high-temperature creep
By G. WIRMARK, J.-O. NILSSON and G. L. DUNLOP 93

Single atom sputtering events. Direct observation of near-surface depleted zones in ion-irradiated tungsten
By M. I. CURRENT, CHING-YEU WEI and D. N. SEIDMAN 103

Black–white contrast on transmission electron microscope images of small dislocation loops in elastically anisotropic crystals
M. WILKENS and H. O. K. KIRCHNER 139

'*In situ*' straining in the HVEM of neutron-irradiated copper crystals
By E. JOHNSON and P. B. HIRSCH 157

A possible model for corrosion pitting and tunnelling in noble-metal alloys
By A. J. FORTY and G. ROWLANDS 171

Partial secondary dislocations in germanium grain boundaries. I. Periodic network in a $\Sigma=5$ coincidence boundary
By J.-J. BACMANN, G. SILVESTRE and M. PETIT 189

Partial secondary dislocations in germanium grain boundaries. II. Reactions with external dislocations in a $\Sigma=25$ coincidence boundary
By W. BOLLMANN, G. SILVESTRE and J.-J. BACMANN 201

Anisotropic post-yielding behaviour of directionally solidified, single-grained eutectics
By K. WAKASHIMA and T. H. COURTNEY 213

Diffusion, correlation, and percolation in a random alloy
By G. E. MURCH and S. J. ROTHMAN 229

Dislocation damping in Cu_3Au alloys
By K. MIURA, K. SHIMANO and T. YOKOYAMA 239

PART B

Editorial PAGE

Screw-dislocation motion in b.c.c. transition metals. Model calculation using a tight-binding-type electronic theory
By A. SATO and K. MASUDA 1

Calculation of core structure and core energy of $\frac{1}{2}\langle 111\rangle\{110\}$ and $\frac{1}{2}\langle 111\rangle\{112\}$ edge dislocations in a b.c.c. transition metal: moments approach
By K. MASUDA, K. KOBAYASHI, A. SATO and T. MORI 19

A cluster model for amorphous antiferromagnetism
By N.-I. FRANZÉN and K.-F. BERGGREN 29

Preparation of amorphous silicon by sputtering in silane
By J. C. ANDERSON, K.-W. KIM and E. SEFERIADES 51

Jahn–Teller interactions at Cr^{2+} in GaAs
By J. E. LOWTHER 61

Electron–phonon interaction in lead and lead–indium alloys under pressure
By V. M. SVISTUNOV, O. I. CHERNYAK, M. A. BELOGOLOVSKII and A. I. D'YACHENKO 75

Analysis of field-effect-conductance measurements on amorphous semiconductors
By M. J. POWELL 93

Small-polaron absorption in $W_xMo_{1-x}O_3$
By E. SALJE and G. HOPPMANN 105

Electron states in heavily doped semiconductors
By B. E. SERNELIUS and K.-F. BERGGREN 115

E.S.R. in doped CVD amorphous silicon films
By S. HASEGAWA, T. KASAJIMA and T. SHIMIZU 149

Correspondence:

A new effect in transport near the mobility edge
By T. LUKES 157

X-ray measurement of charge-density anisotropy in $Fe_{0.70}Ni_{0.30}$ and $Fe_{0.67}Cr_{0.24}$ alloys
By R. CANNATA and G. MAZZONE 161

Carrier scattering by ionized impurities with non-linear screening charge in semiconductors
By D. CHATTOPADHYAY 165

An alternative method of preparing hydrogen-doped evaporated amorphous silicon. Preliminary report
By P. DELLAFERA, R. LABUSCH and H. H. ROSCHER 169

Dependence of the hopping-conductivity exponent on band shape for two-dimensional impurity bands
By S. R. AL-SADEE, P. N. BUTCHER and K. J. HAYDEN 173

Impurity conduction and the minimum metallic conductivity in n-type InSb
By G. BISKUPSKI, H. DUBOIS and D. FERRE 177

Book reviews 183

NUMBER 2—FEBRUARY

PART A

PAGE

Diffusion kinetics and isotope effects for atomic migration via divacancies and triple defects in the CsCl (B2) structure
By H. BAKKER, N. A. STOLWIJK and M. A. HOETJES-EIJKEL 251

Defect structure and ionic conductivity in lithium nitride
By J. R. WALKER and C. R. A. CATLOW 265

Self-diffusion of ^{48}V in vanadium–zirconium alloy
By J. PELLEG 273

Creep and cavity growth under multiaxial stresses
By G. W. GREENWOOD 281

The volume of formation of Schottky defects in ionic crystals
By A. B. LIDIARD 291

The volume of formation of defects in ionic crystals
By M. J. GILLAN 301

An atomistic calculation of extended planar defects in ionic crystals. Application to stacking faults in the alkali halides
By P. W. TASKER and T. J. BULLOUGH 313

Foil thickness measurements from convergent-beam diffraction patterns
By S. M. ALLEN 325

Theoretical free energies for superplasticity and dislocation creep. The origin of the high ductility of superplastic materials
By J. H. GITTUS 337

Metastable Au–Si alloy formation induced by ion-beam interface mixing
By B. Y. TSAUR and J. W. MAYER 345

High-temperature isothermal internal friction of copper and copper–aluminium solid solutions between 10^{-4} and 10 Hz
By R. J. GABORIAUD, J. WOIRGARD, M. GERLAND and A. RIVIERE 363

Internal friction in hydrogen-charged aluminium alloys
By M. LEGER and G. R. PIERCY 377

A dilatometric study of vacancy mobility in the intermetallic compound CoGa
By A. H. VAN OMMEN and J. DE MIRANDA 387

Analytical description of the electron microscopic diffraction contrast of lattice defects in the two-beam case
By K.-H. KATERBAU 409

Self-diffusion in concentrated Fe–Al and Fe–Si alloys
By V. S. RAGHUNATHAN and B. D. SHARMA 427

PAGE

Electron diffraction and microscopy studies of the structure of grain boundaries in silicon
By C. B. CARTER, H. FÖLL, D. G. AST and S. L. SASS 441

Neutron diffraction topographic observation of the {100}-layer substructure in a Cu–5% Ge single crystal
By H. TOMIMITSU 469

Correspondence:

Direct observation of partial dislocation motion in II_b–VI_b compounds
By K. SUZUKI, M. ICHIHARA, K. NAKAGAWA, K. MAEDA, S. TAKEUCHI and H. IWANAGA 499

PART B

Excitations and metastability in amorphous semiconductors
By D. C. LICCIARDELLO, D. L. STEIN and F. D. M. HALDANE 189

The electronic structure of weak, random, two- and three-dimensional potentials
By R. HAYDOCK 203

The mobility of a quantum particle in a three-dimensional random potential
By W. GÖTZE 219

The exceptional properties of mercury and other divalent metals
By A. R. MIEDEMA and J. W. F. DORLEIJN 251

Absence of band-gap surface states on clean amorphous silicon
By J. N. MILLER, I. LINDAU and W. E. SPICER 273

Chemical bonding states in the amorphous Si_xC_{1-x}: H system studied by X-ray photoemission spectroscopy and infrared absorption spectra
By Y. KATAYAMA, K. USAMI and T. SHIMADA 283

Electroabsorption in ZnSe cubic crystals
By J. DAUNAY, J. BAILLOU, J. DAUNAY and P. BUGNET 295

The derivation of force constant information from experimental data
By M. A. BALL and S. HAJAIG 309

Optical activity and the Faraday effect at X-ray frequencies
By M. HART and A. R. D. RODRIGUES 321

Nucleation theory of threshold switching in vanadate–glass devices
By E. GATTEF and Y. DIMITRIEV 333

Dependence of electrical resistivity on the degree of short range order in a nickel–copper alloy
By W. WAGNER, R. POERSCHKE and H. WOLLENBERGER 345

Effect of nitrogen doping on glow-discharge amorphous silicon films
By S. M. PIETRUSZKO, K. L. NARASIMHAN and S. GUHA 357

PAGE

Correspondence:

Molecular dynamics simulation of silicon dioxide glass
By S. K. MITRA, M. AMINI, D. FINCHAM and R. W. HOCKNEY 365

The influence of the substitution of ^{16}O by ^{18}O on the metal–insulator transition temperature of vanadium oxides and magnetite
By M. WOLF, W. REICHELT, H.-P. BRÜCKNER and H. OPPERMANN 373

The Anderson–Mott transition in positive muon diffusion. Determination of a critical index
By T. LUKES 377

Book reviews 381

NUMBER 3—MARCH

PART A

Special Issue. David Tabor Festschrift

Editorial 503

Foreword 505

Appreciations 507

Friction and wear of organic solids and the adhesion model of friction
By B. J. BRISCOE 511

Scratch and indentation hardness of crystals
By C. A. BROOKES 529

The effect of lead on the friction and machining of brass
By N. GANE 545

Lubrication in metal cutting and grinding
By G. W. ROWE 567

The friction of diamond
By M. SEAL 587

Strength and fracture properties of diamond
By J. E. FIELD and C. J. FREEMAN 595

Dynamic mechanical loss properties of wood
By D. ATACK 619

Surfaces produced by guillotining
By A. G. ATKINS 627

Dynamic hardness, deformation and fracture of simple ionic crystals at very high rates of strain
By M. M. CHAUDHRI, J. K. WELLS and A. STEPHENS 643

The plasticity of polycrystalline ice
By D. J. GOODMAN, H. J. FROST and M. F. ASHBY 665

The mechanics of adhesion of viscoelastic solids
By J. A. GREENWOOD and K. L. JOHNSON 697

PAGE

Interfacial dislocations in tough adhesive composites
By K. KENDALL 713

The effect of oxygen on the adhesion of clean metal surfaces
By J. B. PETHICA 731

The use of wetting behaviour at an oil–water interface to study changes in a polymer surface
By H. J. CHMIELEWSKI and A. I. BAILEY 739

The forces between surfaces
By J. N. ISRAELACHVILI 753

Translational diffusion in entangled polyethylene melts
By J. KLEIN 771

Low-energy electron diffraction as a surface probe
By L. J. CLARKE 779

The simulation of FIM desorption patterns
By A. J. W. MOORE 803

Photoelectron spectroscopy of the iron borides. Structure, bonding and magnetic behaviour
By D. J. JOYNER and R. F. WILLIS 815

The use of electron optics in studying surfaces. A summary of an area of David Tabor's work
By A. E. LEE 835

PART B

A structural model for B_2O_3 glass
By R. J. BELL and A. CARNEVALE 389

Transit-pulse dispersion in a spatially random hopping system
By J. M. MARSHALL 401

The lifetime of injected carriers in amorphous silicon p–n junctions
By A. J. SNELL, W. E. SPEAR and P. G. LE COMBER 407

Implantation damage in amorphous silicon
By G. MÜLLER and P. G. LE COMBER 419

A model for the electronic transport in hydrogenated amorphous silicon
By H. OVERHOF and W. BEYER 433

Structural investigation of hydrogenated amorphous silicon by X-ray diffraction
By W. SCHÜLKE 451

Pressure dependence of the electrical conductivity of amorphous red phosphorus
By P. EXTANCE and S. R. ELLIOTT 469

Pressure dependence of the electrical properties of amorphous phosphorus prepared by chemical transport in a low-pressure hydrogen plasma
By P. EXTANCE and S. R. ELLIOTT 485

The electronic structure of model lead glasses
By J. ROBERTSON 497

PAGE

The temperature dependence of the d.c. conductivity near the Anderson transition in three-dimensional systems
By D. BELITZ and W. GÖTZE 517

Preparation and properties of amorphous phosphorus nitride prepared in a low-pressure plasma
By S. VEPŘEK, Z. IQBAL, J. BRUNNER and M. SCHÄRLI 527

Local symmetry and chemical characteristics of the arsenic site in arsenic-containing glasses
By J. SZEFTEL 549

Book reviews 575

NUMBER 4—APRIL

PART A

Dynamic studies of metal oxide catalysts: MoO_3
By P. L. GAI 841

The mechanism for craze-tip advance in glassy polymers
By A. M. DONALD and E. J. KRAMER 857

A Monte Carlo study of diffusion in a model of an ordered adsorbate
By G. E. MURCH 871

The atomic structure of dislocations in h.c.p. metals. I. Potentials and unstressed crystals
By D. J. BACON and J. W. MARTIN 883

The atomic structure of dislocations in h.c.p. metals. II. Behaviour of the core under an applied stress
By D. J. BACON and J. W. MARTIN 901

Correlation factors for diffusion in dilute interstitial solid solutions
By A. D. LE CLAIRE 911

Positron-annihilation studies of deformation of single crystals of Al–4 wt. % Cu
By S. PANCHANADEESWARAN and J. G. BYRNE 921

Determination of the spinodal temperature in a series of Al–Zn (6–21 at. %) alloys
By T. UNGÁR, J. LENDVAI and I. KOVÁCS 927

A double-line image of a dislocation in a silicon single crystal observed by X-ray plane wave topography
By K. ISHIDA, A. OOTUKA and S. TAKAGI 935

Distinguishing dissociated glide and shuffle set dislocations by high resolution electron microscopy
By A. OLSEN and J. C. H. SPENCE 945

Force–displacement curve for dislocations in potassium chloride
By W. H. ROBINSON 967

PAGE

The diffusion of ^{63}Ni along grain boundaries in nickel oxide
By A. ATKINSON and R. I. TAYLOR 979

Heavy-ion irradiation of nickel and nickel alloys
By T. M. ROBINSON and M. L. JENKINS 999

The core structure of $\frac{1}{3}\langle\bar{1}\bar{1}23\rangle\{11\bar{2}2\}$ edge dislocations in h.c.p. metals
By Y. MINONISHI, S. ISHIOKA, M. KOIWA, S. MOROZUMI and M. YAMAGUCHI 1017

Planar faults in the $L1_2$ lattice. Stability and structure
By M. YAMAGUCHI, V. VITEK and D. P. POPE 1027

$\langle 011\rangle$ tilt boundaries in the diamond cubic lattice
By H.-J. MÖLLER 1045

Correspondence:
A note on the influence of hydrostatic pressure on dislocations
By J. JUNG 1057

PART B

A theoretical study of defects in amorphous arsenic
By E. P. O'REILLY 579

Calculations of off-centre displacements of divalent substitutional ions in CaO, SrO and BaO from model potentials
By M. J. L. SANGSTER and A. M. STONEHAM 597

Multiple charge-states of transition metal impurities
By A. M. STONEHAM and M. J. L. SANGSTER 609

Transport properties, magnetic susceptibility and Mössbauer spectroscopy of $Fe_{0.25}NbS_2$ and $Fe_{0.33}NbS_2$
By O. GOROCHOV, A. LE BLANC-SOREAU, J. ROUXEL, P. IMBERT and G. JEHANNO 621

The structure of the incommensurate superlattices of 2H-$TaSe_2$
By R. L. WITHERS and L. A. BURSILL 635

A structural model for the interface between amorphous and (100) crystalline silicon
By T. SAITO and I. OHDOMARI 673

Surface characterization of uranium metal and uranium dioxide using X-ray photoelectron spectroscopy
By G. C. ALLEN, I. R. TRICKLE and P. M. TUCKER 689

Vibrational entropies of defects in solids
By J. H. HARDING and A. M. STONEHAM 705

Electron-irradiation studies of p–n junctions in silicon bipolar transistors
By L. M. BROWN and D. FATHY 715

Book reviews 733

NUMBER 5—MAY

PART A

PAGE

Combined FIM/TEM determination of the structure of an incoherent twin boundary in tungsten
By P. A. Beaven, D. A. Smith, M. K. Miller and G. D. W. Smith .. 1063

The self-diffusion of Ni in undoped and Al-doped NiO single crystals
By A. Atkinson, A. E. Hughes and A. Hammou 1071

Determination of the miscibility gap in the Al–Be system by resistivity measurements and X-ray small-angle scattering
By S. Ceresara, A. Benedetti, G. Cocco and S. Enzo 1093

Crack tip blunting by dislocation pair creation and separation
By J. Weertman 1103

An investigation of the mobility of vacancies and interstitials in a Ag–9 at. % Zn alloy by means of high-voltage electron microscopy
By M. Halbwachs and N. Yoshida 1125

The contribution of pyramidal forest dislocations to the hardening of zinc single crystals
By J. P. Michel and G. Champier 1139

Unusual lattice parameters in two-phase systems after annealing
By E. J. Mittemeijer, P. van Mourik and Th. H. de Keijser 1157

Periodic displacement and stress fields near a phase boundary in the isotropic elasticity theory
By R. Bonnet 1165

Low-temperature isotope effect of hydrogen diffusion in f.c.c. metals and alloys
By B. Hohler and H. Kronmüller 1189

Measurement of the impurity diffusion of In in Ni single crystals by secondary-ion mass spectrometry (SIMS)
By W. Gust, M. B. Hintz, A. Lodding and H. Odelius 1205

The energy spectrum of sputtered atoms II
By M. M. R. Williams 1221

Observation of [110] tilt boundary structures in gold by high resolution HVEM
By H. Ichinose and Y. Ishida 1253

Planar faults and dislocation dissociations in body-centred-cubic-derivative ordered structures
By M. Yamaguchi, D. Pope, V. Vitek and Y. Umakoshi 1265

Cathodoluminescence evidence of dislocation interactions in diamond
By N. Sumida and A. R. Lang 1277

On the mobility of dislocations in silicon by *in situ* straining in a high-voltage electron microscope
By F. Louchet 1289

Formation of gallium interstitials during zinc diffusion into gallium arsenide
By R. K. Ball, P. W. Hutchinson and P. S. Dobson 1299

PART B

PAGE

An asymmetric double-well potential model for structural relaxation processes in amorphous materials
By K. S. Gilroy and W. A. Phillips 735

OH in vitreous silica. An atomic tunnelling state
By W. A. Phillips 747

Pinning of magnetic domain walls at dislocations and precipitates in Co_5Sm crystals
By J. Fidler, H. Kirchmayr and P. Skalicky 765

Photoconductivity studies of the mobility edge in amorphous silicon
By W. E. Spear, H. Al-Ani and P. G. Le Comber 781

Theory of electrical conduction in particulate systems
By D. P. H. Smith and J. C. Anderson 797

Electrical conduction in particulate thick films
By D. P. H. Smith and J. C. Anderson 811

On the theory of a.c. conduction in amorphous semiconductors and chalcogenide glasses
By A. L. Efros 829

Structure and energy level calculations of dislocations in gallium arsenide
By R. Jones, S. Öberg and S. Marklund 839

Antiferromagnetic *S*-domains in NiO. I. Neutron magnetic topographic investigation
By J. Baruchel, M. Schlenker, K. Kurosawa and S. Saito 853

Antiferromagnetic *S*-domains in NiO. II. Effect of crystallographic twinning on the visibility of domains by X-ray topography
By J. Baruchel, M. Schlenker, K. Kurosawa and S. Saito 861

Calculation of the interaction energy between a self-interstitial and a (1/2)⟨111⟩ screw dislocation in b.c.c. transition metals. Moments approach
By K. Masuda, Y. Sugano and A. Sato 869

A high-resolution study of the electrical resistivity of thin noble-metal foils
By A. D. Caplin, M. N. Dalimin and S. Senoussi 881

Magnetic ordering in strained chromium
By I. S. Williams and R. Street 893

Ultra-high-resolution electron microscopy of amorphous materials at 120 kV
By D. J. Smith, W. M. Stobbs and W. O. Saxton 907

Correspondence:

The interatomic potential and the long-range $S(k)$ in liquids
By C. C. Matthai 925

Anisotropy in the Compton profile of vanadium
By A. Rollason, M. Cooper, R. S. Holt, I. Bailey and T. J. L. Jones 931

Thermodynamic evidence of clustering in liquid Ga–Te alloys
By S. F. Johnston 937

The random-phase model in non-crystalline systems
By N. F. Mott 941

Trap-controlled hopping in a system with a Gaussian distribution of the energy of hopping sites
By M. Silver, G. Schönherr and H. Bässler 943

Book reviews 949

NUMBER 6—JUNE

PART A

PAGE

Asymptotic form of activation energy for double-kink formation in a dislocation in a one-dimensional periodic field
By T. MORI and M. KATO 1315

A theory of peaks in the time-of-flight spectrum of gold atoms sputtered from a (100) surface
By M. W. FINNIS 1321

The nature of special-mode softening and the mechanism of martensitic phase transition in β-phase alloys
By A. NAGASAWA, N. NAKANISHI and K. ENAMI 1345

The precipitation of the cubic Suzuki phase in NaCl: Cd^{2+} and NaCl: Mg^{2+}
By A. L. GUERRERO, E. P. BUTLER, P. L. PRATT and L. W. HOBBS 1359

Slip systems in a body-centred-cubic Li–Mg alloy
By H. SAKA and G. TAYLOR 1377

Self-energy and self-force of dislocations
By H. O. K. KIRCHNER 1393

On the analysis of diffusion anomalies in Ti alloys
By J. M. SANCHEZ 1407

The spatial distribution of self-interstitial atoms around depleted zones in tungsten ion-irradiated at 10 K
By C.-Y. WEI and D. N. SEIDMAN 1419

The secondary transmission of energy in collision sequences
By V. V. KIRSANOV 1441

The pressure dependence of elastic constants and bond bending in HgTe
By A. J. MILLER, G. A. SAUNDERS, Y. K. YOĞURTÇU and A. E. ABEY 1447

The calculation of defect energies in the perovskite fluoride $KMnF_3$
By J. A. KILNER 1473

Morphology and crystallography of the isothermal martensite transformation in Fe–Ni–Mn alloys
By S. KAJIWARA 1483

New stages in stress–strain curves of germanium at high temperatures
By H. G. BRION, H. SIETHOFF and W. SCHRÖTER 1505

Melting phenomenon and properties of defects associated with pulsed laser irradiation
By J. NARAYAN and C. W. WHITE 1515

Optimized tensile conditions for the *in situ* X-ray topographic observation of glide dislocations in single crystals
By C. G'SELL and G. CHAMPIER 1537

Grain boundary diffusional creep of materials containing particles
By B. BURTON and W. B. BEERÉ 1561

On producing high-spatial-resolution composition profiles via scanning transmission electron microscopy
By E. L. HALL, D. IMESON and J. B. VANDER SANDE 1569

Correspondence:

The effect of specimen thickness on X-ray profiles in STEM
By M. E. TWIGG, M. H. LORETTO and H. L. FRASER 1587

Cross-slip characterization in spinel $MgO \cdot 1{\cdot}8\,Al_2O_3$ deformed at high temperatures
By R. DUCLOS, N. DOUKHAN and B. ESCAIG 1595

PAGE

Phénomènes métallurgiques observés après irradiation au laser de l'alliage ordonné Ni_3Fe
Par M. F. RICHARD, J. P. EYMERY et H. GAREM 1601

Subject index 1607

Index of authors (with titles) 1615

PART B

The effect of tensile stress on the Néel temperature in chromium
By I. S. WILLIAMS and R. STREET 955

Transmission spectra of lithium intercalation complexes of some layered transition-metal dichalcogenides. I. Group-IVA octahedral coordination
By A. R. BEAL and S. NULSEN 965

Transmission spectra of lithium intercalation complexes of some layered transition-metal dichalcogenides. II. Group VA: trigonal prismatic coordination
By A. R. BEAL and S. NULSEN 985

Compton profiles of 3d transition metals
By K. R. KRISHNA GANDHI and R. M. SINGRU 999

Low-temperature specific heats of α-phase alloys based on copper
By M. D. TIWARI, P. N. RAM and V. K. MANCHANDA 1005

The theory of anomalous carrier pulse propagation in amorphous semiconductors. II. Extension to later phases in the life of the pulse
By J. D. CLARK and P. N. BUTCHER 1017

The theory of anomalous carrier pulse propagation in amorphous semiconductors. III. Derivation of a macroscopic conservation equation for carriers hopping on a lattice of sites with random positions and energies
By P. N. BUTCHER and J. D. CLARK 1029

Thermal expansion of amorphous As_2S_3 at low temperatures
By G. J. MORGAN, G. K. WHITE and J. G. COLLINS 1039

Higher order elasticity of amorphous As_2S_3
By M. P. BRASSINGTON, A. J. MILLER and G. A. SAUNDERS 1049

Photoinduced absorption in Se–Ge glasses
By A. J. MOSELEY and J. M. CHAMBERLAIN 1065

Electrophotographic studies of glow-discharge amorphous silicon
By S. ODA, Y. SAITO, I. SHIMIZU and E. INOUE 1079

Oxidation and interface states in a-Si:H
By R. A. STREET and J. C. KNIGHTS 1091

Structure of molten alkali chlorides. I. A molecular dynamics study
By M. DIXON and M. J. GILLAN 1099

Structure of molten alkali chlorides. II. Semi-analytic methods
By G. M. ABERNETHY, M. DIXON and M. J. GILLAN 1113

The absolute scale of thermoelectricity II
By R. B. ROBERTS 1125

Subject index 1137

Index of authors (with titles) 1145
